What Version is best for you?

Do you require access for more than 1 person?

If you are a single user, will you require access to your Power Retrieve Database from any other PC than your own?

If you answer “Yes” to any of the questions, then PowerRetrieve Network is for you. If not, then you only need PowerRetrieve Lite.

Remember if you do answer “No” to all of these now, but your circumstances change, you can easily upgrade and migrate to PowerRetrieve Network at anytime.

If you are unsure or have any questions then please contact Dan Dicker on 01920 444636 who will be more than happy to assist.
