

How Does it work?

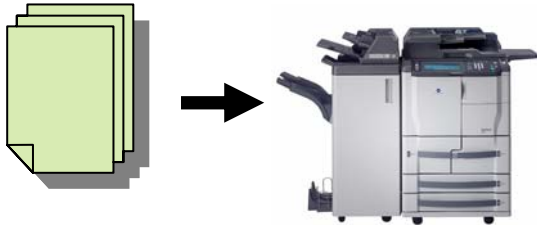

This simple diagram shows how versatile, quick and simple it is to get any document into PowerRetrieve.

Using either a Flatbed Scanner, Multifunction Device or even the original electronic file, PowerRetrieve can read and archive the document enabling you to find it at a later date with ease.

Here's how it works...

Printed Paper Document i.e. invoice/letter etc...

PowerRetrieve support both file system (SMB) and FTP as a method of capture

Electronic Files

PowerRetrieve supports over 200 different file types and includes free viewers - so even if the person at the other end doesn't has the original program - they can still view it!
