

PowerRetrieve – Search-on-CD

HARNESS THE 'POWER' OF YOUR INFORMATION WITH CD DISTRIBUTION

It's as Simple as ABC

- A** Automatic Document Indexing
- B** Browse, Label & Content searches
- C** CD, Storage and Retrieval from any* PC

PowerRetrieve – Index/Search-on-CD records both scanned electronic images and PDF files, along with the powerful search engine, onto CD.

PowerRetrieve users can search for specific information – from within the file room held on CD – by browsing folders, searching by the document labels or search on the contents of every image document within the data set. All within seconds.

PowerRetrieve enables you to provide your Customers, Suppliers, Staff or Users with a self contained data set on CD, with a simple to use but highly powerful search capability.

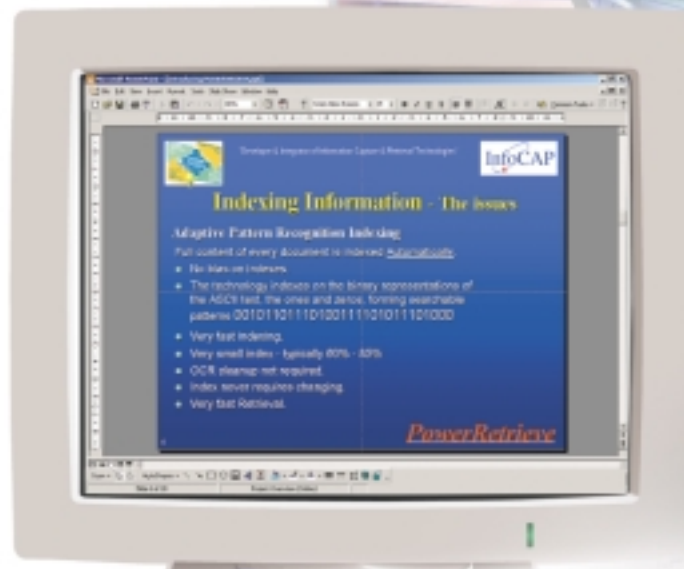

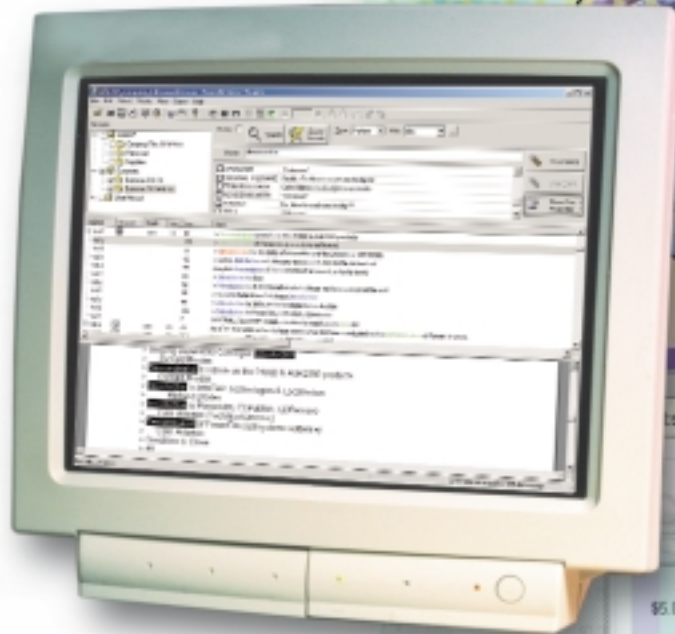

- Simple to use Windows based solution to any data distribution needs, on a transportable media.
- No more manual indexing and costly distribution of crucial information.
- No limit to the number of copies of CD's per data set.
- Retrieved documents can be Printed, Faxed or automatically attached and Emailed** at the click of a button.
- No Re-Filing, when you finish with a document, simply close it.

Whenever you need a Self contained, Transportable, Fully searchable Data set, PowerRetrieve – Search-on-CD is the answer.

PowerRetrieve – Search-on-CD: Ideal for Service Records, Manuals, Research and Project files or Catalogues.

* See technical Specification on back of brochure for minimum specification required

** Automatically links to any MAPI compliant Email system on your PC
